## Paper Banner Rotator (XML driven) with 4 transition versions

---

### Features:

- XML driven - you don't need Flash to edit it
- unlimited items
- supports images (JPG/PNG/GIF) and SWF files
- provided in four different versions
- paper size can be different than banner size
- left and top margin value for paper alignment
- background for banner (JPG/PNG/GIF or SWF file)
- custom pause time & rendering focal length for each item/slide
- custom opening URL for each item (or no url given)

### Versions:

Provided in four different transition animations versions (4 different banner SWF files):

- PaperBannerRotator01.swf - **74kb**
- PaperBannerRotator02.swf - **76kb**
- PaperBannerRotator03.swf - **72kb**
- PaperBannerRotator04.swf - **67kb**

### Configuring XML:

Set path to your XML configuration file in HTML document with FlashVars:

```
flashvars.xmlFile = "xml/config.xml";
```

### XML config file:

```
<config
  hidePreloader="true"
  globalDelay="5"
  globalFocalLength="400"
  paperWidth="400"
  paperHeight="300"
  paperTopMargin="10"
  paperLeftMargin="40"
  backgroundFile="background.jpg"
/>
```

- **hidePreloader** - show or hide preloader ("true" or "false" value)
- **globalDelay** - global delay pause (in seconds) between slides (if not given - default value is 5)
- **globalFocalLength** - global focal length value for every slide (if not given - default value is 800)
- **paperWidth** - width of paper (if not given SWF width is used)
- **paperHeight** - height of paper (if not given SWF height is used)
- **paperTopMargin** - paper margin value from top (if not given - will be centered vertically)
- **paperLeftMargin** - paper margin value from left (if not given - will be centered horizontally)
- **backgroundFile** - URL path to file with background (SWF or image file) - if not given there will be no background

### XML config file – single item:

```
<item forceDelay="0.5" forceFocal="555">
  <file>img/image.jpg</file>
  <link window="_blank">http://activeden.net</link>
</item>
```

- **forceDelay** - set delay pause time (in seconds) for item (if not given - will use **globalDelay**)
- **forceFocal** - set rendering focal length value for item (if not given - will use **globalFocal**)
- **file** - URL path to image or SWF file
- **link** - opening URL for item
- **window** - window opening type for item

---
